“Acasti’s participation in these international conferences reinforces the global interest in our wholly owned CaPre, a potential new treatment for hypertriglyceridemia,” said Jan D’Alvise, Acasti’s president and chief executive officer. “Data to be presented highlights and compares CaPre’s safety and efficacy profile with commercially available omega-3 prescription drugs. Based on the clinical performance seen in our Phase 1 and 2 studies, we believe CaPre has the potential to be a best-in-class omega-3 therapeutic offering superior lipid benefits that may reduce patients’ cardiovascular disease risk.”

### **About Acasti Pharma**

Acasti Pharma is a biopharmaceutical innovator advancing a potentially best-in-class cardiovascular drug, CaPre® (omega-3 phospholipid), for the treatment of hypertriglyceridemia, a chronic condition affecting an estimated one third of the U.S. population. The Corporation’s strategy is to initially develop and commercialize CaPre for the 3 to 4 million patients in the U.S. with severe hypertriglyceridemia. Since its founding in 2008, Acasti Pharma has focused on addressing a critical market need for an effective, safe and well-absorbing omega-3 therapeutic that can make a positive impact on the major blood lipids associated with cardiovascular disease risk.
